CAD-CUT® ADHESIVE

PLOTTABLE THERMAL ADHESIVE FOR HEAT TRANSFER FOILS

CAD-CUT® Adhesive is a plottable heat activated adhesive which is needed for applying heat transfer foils.

Cut the desired design as you would cut a regular flex film, apply adhesive to textile, cover design with heat transfer foil (color side facing up) and press.

That's how easy it is to produce beautiful and shiny foil-embellished designs.

AVAILABLE IN

30 cm x 9,1 m rolls
