TOTAL PROTECT | PU PPF

BEST SELLER!

ABOUT

Scarless 140 is an aliphatic polyurethane protection film of 140 micron, specially developed to reduce corrosion, stone chipping, scratching and insect damage on painted surfaces. The highly elastic film is easy to apply and can be used to wrap a vehicle entirely or in order to protect specific, vulnerable areas. The PU film is ultra-clear and has great UV resistance. Our PU film has a matt PET liner to ensure an optimal gloss finish and is available with both a PE and PET protection film.

The PU film with **PE protection film** is easier to handle and transport when cut down in smaller sheets or rolls.

Typical applications:

For all types of motorized vehicles, either as a full wrap or when protecting specific parts of a vehicle. Also used in industrial applications.

FEATURES

- ✓ INVISIBLE PROTECTION SKIN
- ✓ EASY TO APPLY
